REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The present invention is directed to an automatic beam limiter circuit for controlling a brightness/contrast of the video signal input to a cathode ray tube (CRT). Each independent claim identifies the uniquely distinct features: "a horizontal average circuit for calculating a horizontal average of at least a portion of the digital signal; a vertical average circuit for calculating a vertical average of the horizontal average; a comparison circuit for comparing a first calculation value calculated between a reference value and the vertical average with a second calculation value calculated between the reference value and the horizontal average, and outputting a first comparison signal and second comparison signal based on the comparison result". The closest prior art, Kasahara et al (US Patent No. 6,351,253 B2) disclose the display apparatus capable of adjusting subfield number according to brightness, and Lee (US Patent No. 5,546,134) discloses video brightness/contrast enhancement method adaptive to a scene and circuit therefor, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Trang U. Tran whose telephone number is (703) 305-0090. The examiner can normally be reached on 8:00 AM - 5:30 PM, Monday to Friday.
